

www.ascolia.com

With this overview, we would like to offer you a brief summary of Ascolia's comprehensive and diversified portfolio, which includes classics as well as contemporary rolling furniture.

These two categories will be presented throughout the following pages. Additional categorisation by function and type allows you to find all of the models produced by Ascolia at a glance. All used materials as well as our production and design philosophy are explained in detail in this catalogue which informs you about the high quality of our rolling furniture.

Once you have found the piece of rolling furniture you would like to have, our homepage www.ascolia.be takes you to the next step and through the broad spectrum of product versions, or you can obtain expert advice from our specialist trade partners.

Ascolia offers you a choice – the diversity of our models and materials has something for every taste. If you have time and are interested, please visit our showroom and factories in Belgium.

We look forward to your visit!

*This catalogue has been carefully compiled, just like each Ascolia product.
The Ascolia team wishes you a pleasant read!*

DID YOU KNOW?

Light as air, fluttering with ease, harmonious & efficient, a necessity to its environment,...

The Ascolia is a butterfly that originates from South America.

What a wonderful source of inspiration for our designers.

ABOUT US

The unique success story of Ascolia began in 2004. Similar to the transformation of a caterpillar into a butterfly: Ascolia was born out of the sheet metal processing and subcontracting company Dewinter - grounded in 1983.

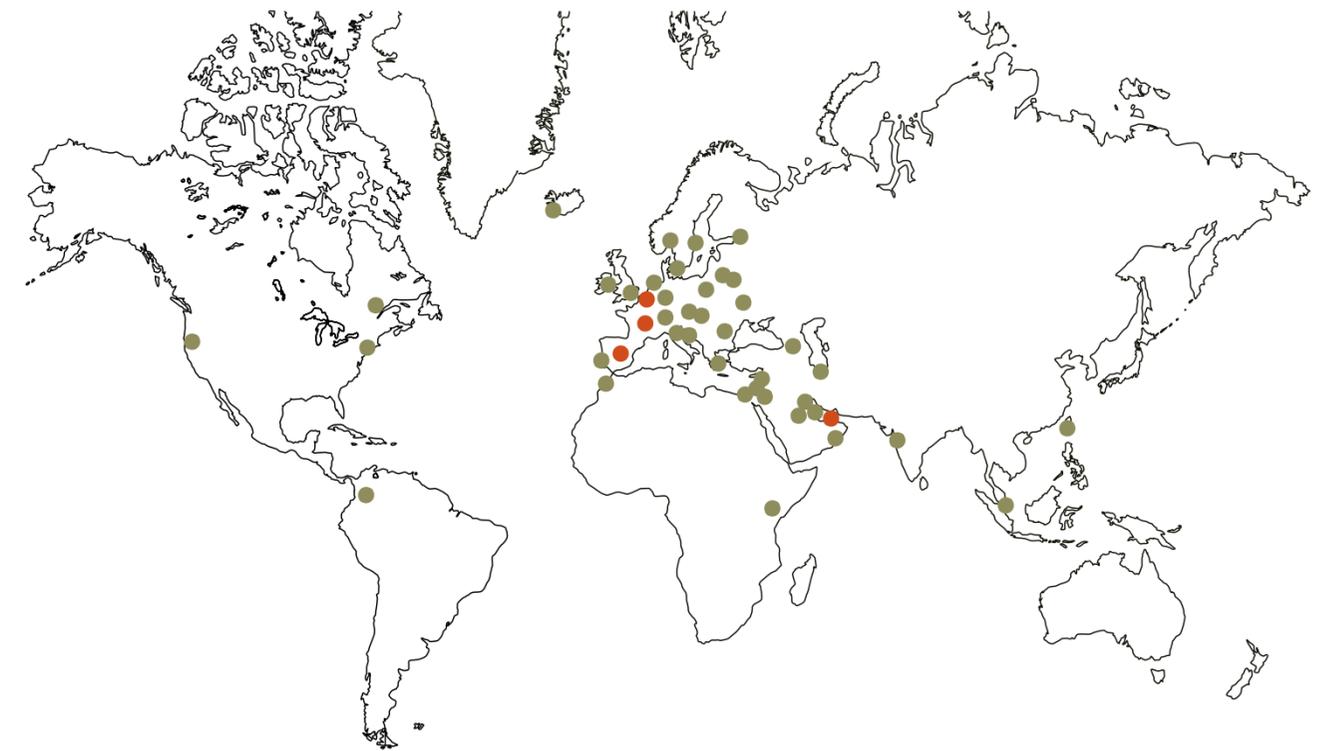

With a passion for design, the right choice of materials and a good combination of both manual craftsmanship and high-tech manufacturing processes the Ascolia product was designed to answer the current and future demands of ergonomic, user-friendly and ecological equipment for both the hospitality and medical industry.

Today, Ascolia has its assembly factory in Sint-Pieters-Leeuw - Belgium - and belongs to **Icarus, a family-based group of Belgian companies**. Each factory in the family group has its own specialty in metal processing and delivers the best quality with state-of-the-art high-tech machinery. In this way, all components of our Ascolia products are locally made and manufactured in-house in order to have the maximum flexibility, the best control over the supply chain and the best quality.

Over the course of time, elementary identifying features such as custom-tailored production of products have developed into what they are today: Ascolia develops products that always take sustainability and individuality under consideration. They stand out due to their high-quality materials and timeless formal language.

PRODUCTION FACILITIES (7)

- Ardooie, Belgium (3)
- Beernem, Belgium (1)
- Diksmuide, Belgium (1)
- Erpe-Mere, Belgium (1)
- **Sint-Pieters-Leeuw, Belgium (1)**

The Ascolia sales network around the world, with own Ascolia sales offices in **Belgium, France, Spain & Dubai**.

“Our craftsmanship inspires good design”

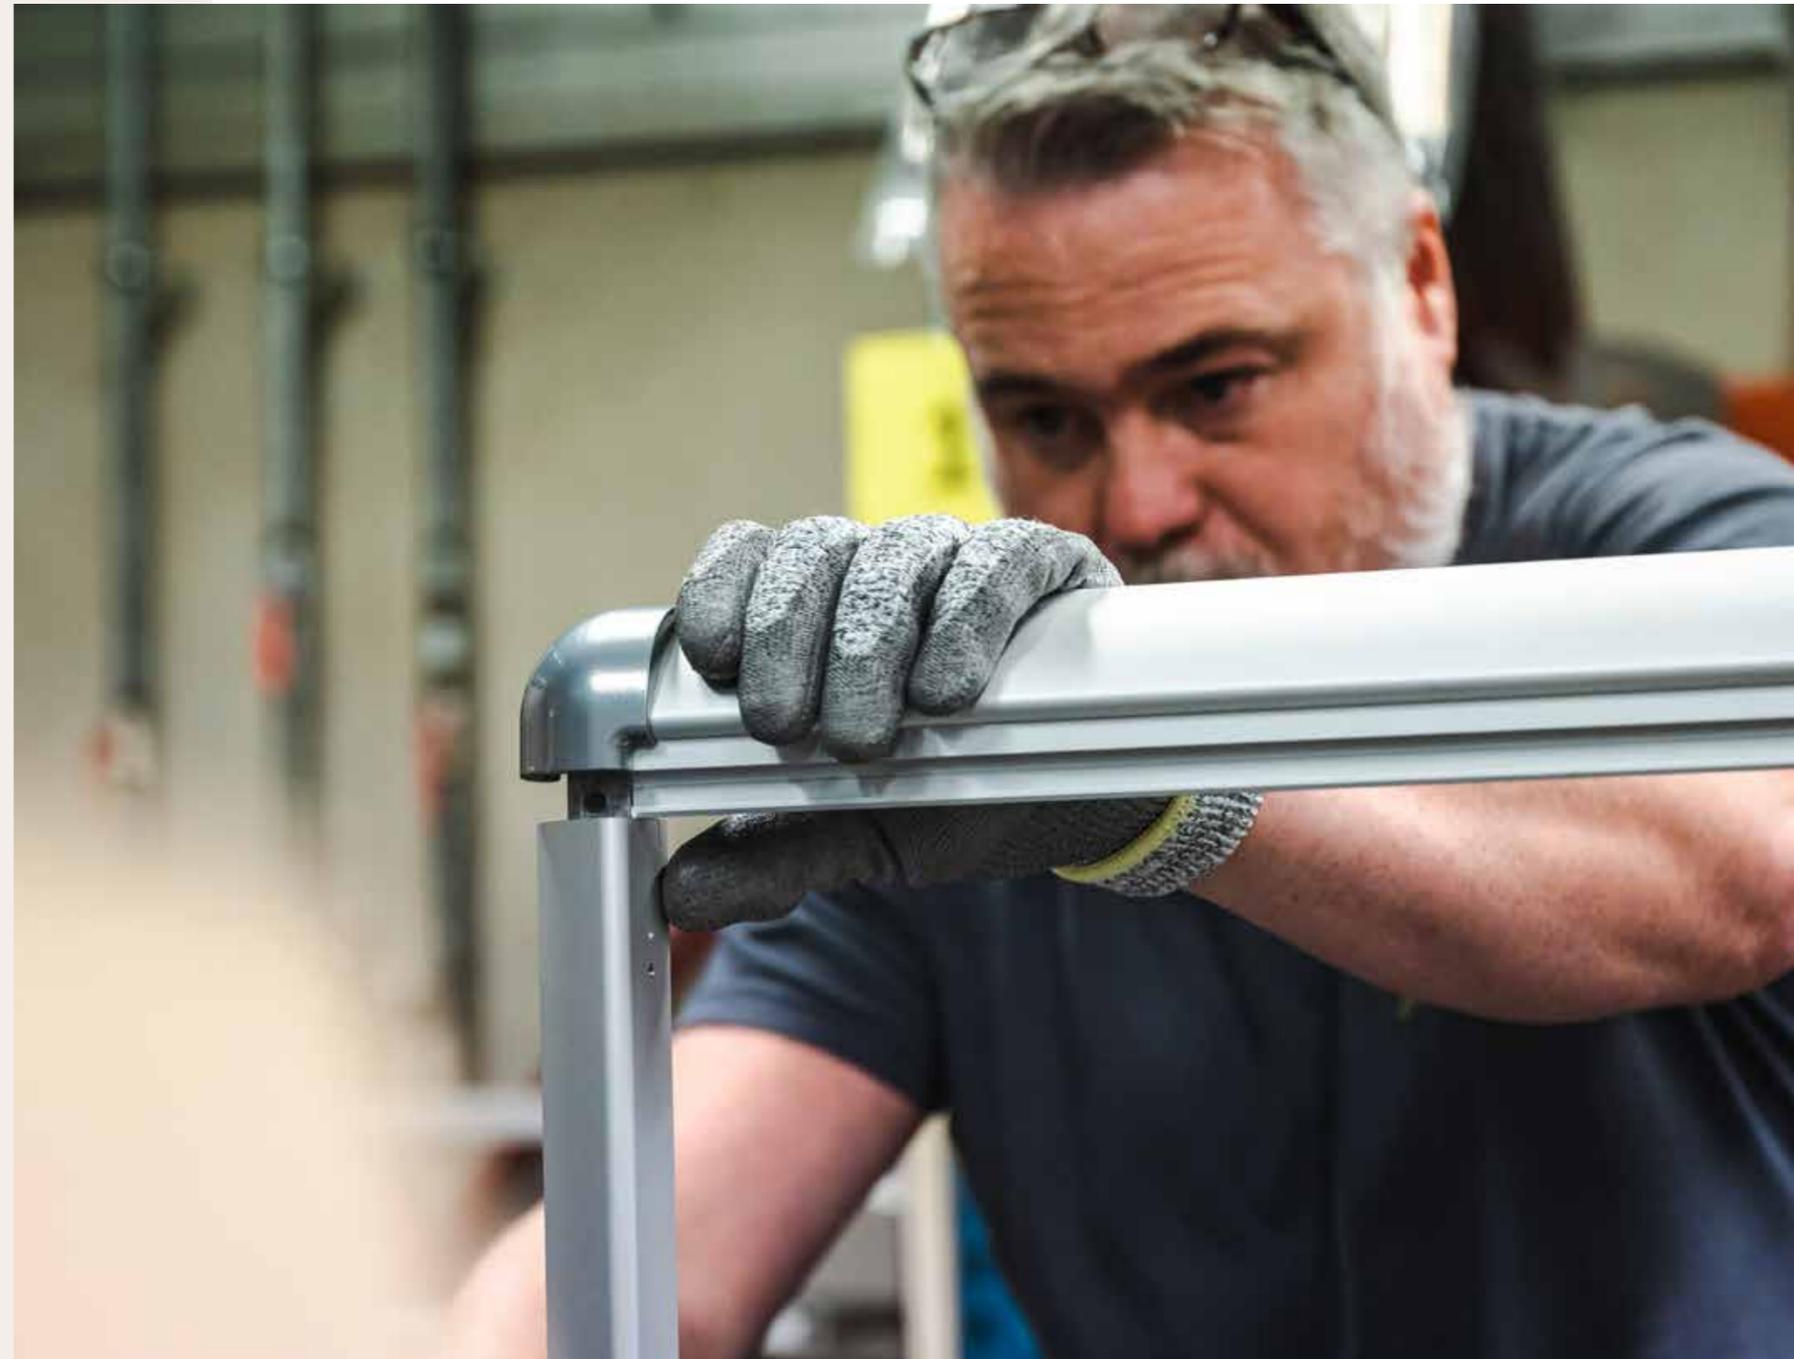

Traditional craftsmanship meets cutting-edge technology: for almost two decades Ascolia has been producing rolling furniture for the luxury hospitality industry and the medical industry.

Excellent rolling furniture - made out of aluminium and composite materials - is produced in the Sint-Pieters-Leeuw facility with a **great passion** for the materials and **unique precision**.

The combination of cutting-edge production technologies and traditional craftsmanship has made Ascolia one of the leading and most successful companies worldwide specialising in the manufacture of durable and user-friendly trolleys for luxury hotels and medical applications.

The employees in the production facilities provide specific know-how that has been compiled and permanently optimised over the course of the Icarus group's long history.

Ascolia has always been producing innovative products with durability in mind: Ascolia products stand out due to their highest quality standards and timeless formal language. A carefully designed concept and several production steps stand behind every Ascolia product - from the processing of durable compact panels or colouring of aluminium extruded profiles to the manufacturing of fine sheet metal components and stitching leather handles. **Each piece of rolling furniture thus has its own story to tell even before it leaves the Sint-Pieters-Leeuw facility.**

“Individuality is our standard”

The sensitive selection of the surfaces is decisive for the character of any Ascolia product. Therefore, Ascolia offers a wide range of materials, allowing for an individual and special touch for each piece.

In our Sint-Pieters-Leeuw facility, we have an exclusively order-related production process, giving you the opportunity to dress up your trolley individually to match your style and your operational efficiency. Create your personal trolley or rolling furniture by choosing from our comprehensive collection of materials for frames, panels and leather accessories.

You can choose from multiple variations of compact panels to be fitted on your personally configured trolley. The compact panel has the advantage that it is highly scratch-resistant, light as aluminium and has a very high resistance to abrasive chemicals.

Together with the chosen design, you have your personal trolley which is easy to maintain and long-lasting.

The frame is completely made out of anodised aluminium which you can choose among different colours. Your choice of colour comes all with the same durable colourfastness and fingerprint-free solution easy to maintain and build to last.

Still haven't found what you're looking for? In addition to our comprehensive standard collection, we are happy to fulfil your special request. Simply supply us with your favourite mood board and we will look for the best possible solution in accordance with our quality label.

We exclusively use high-quality materials for our rolling furniture which are subjected to systematic quality management and have to comply with our sustainability standards.

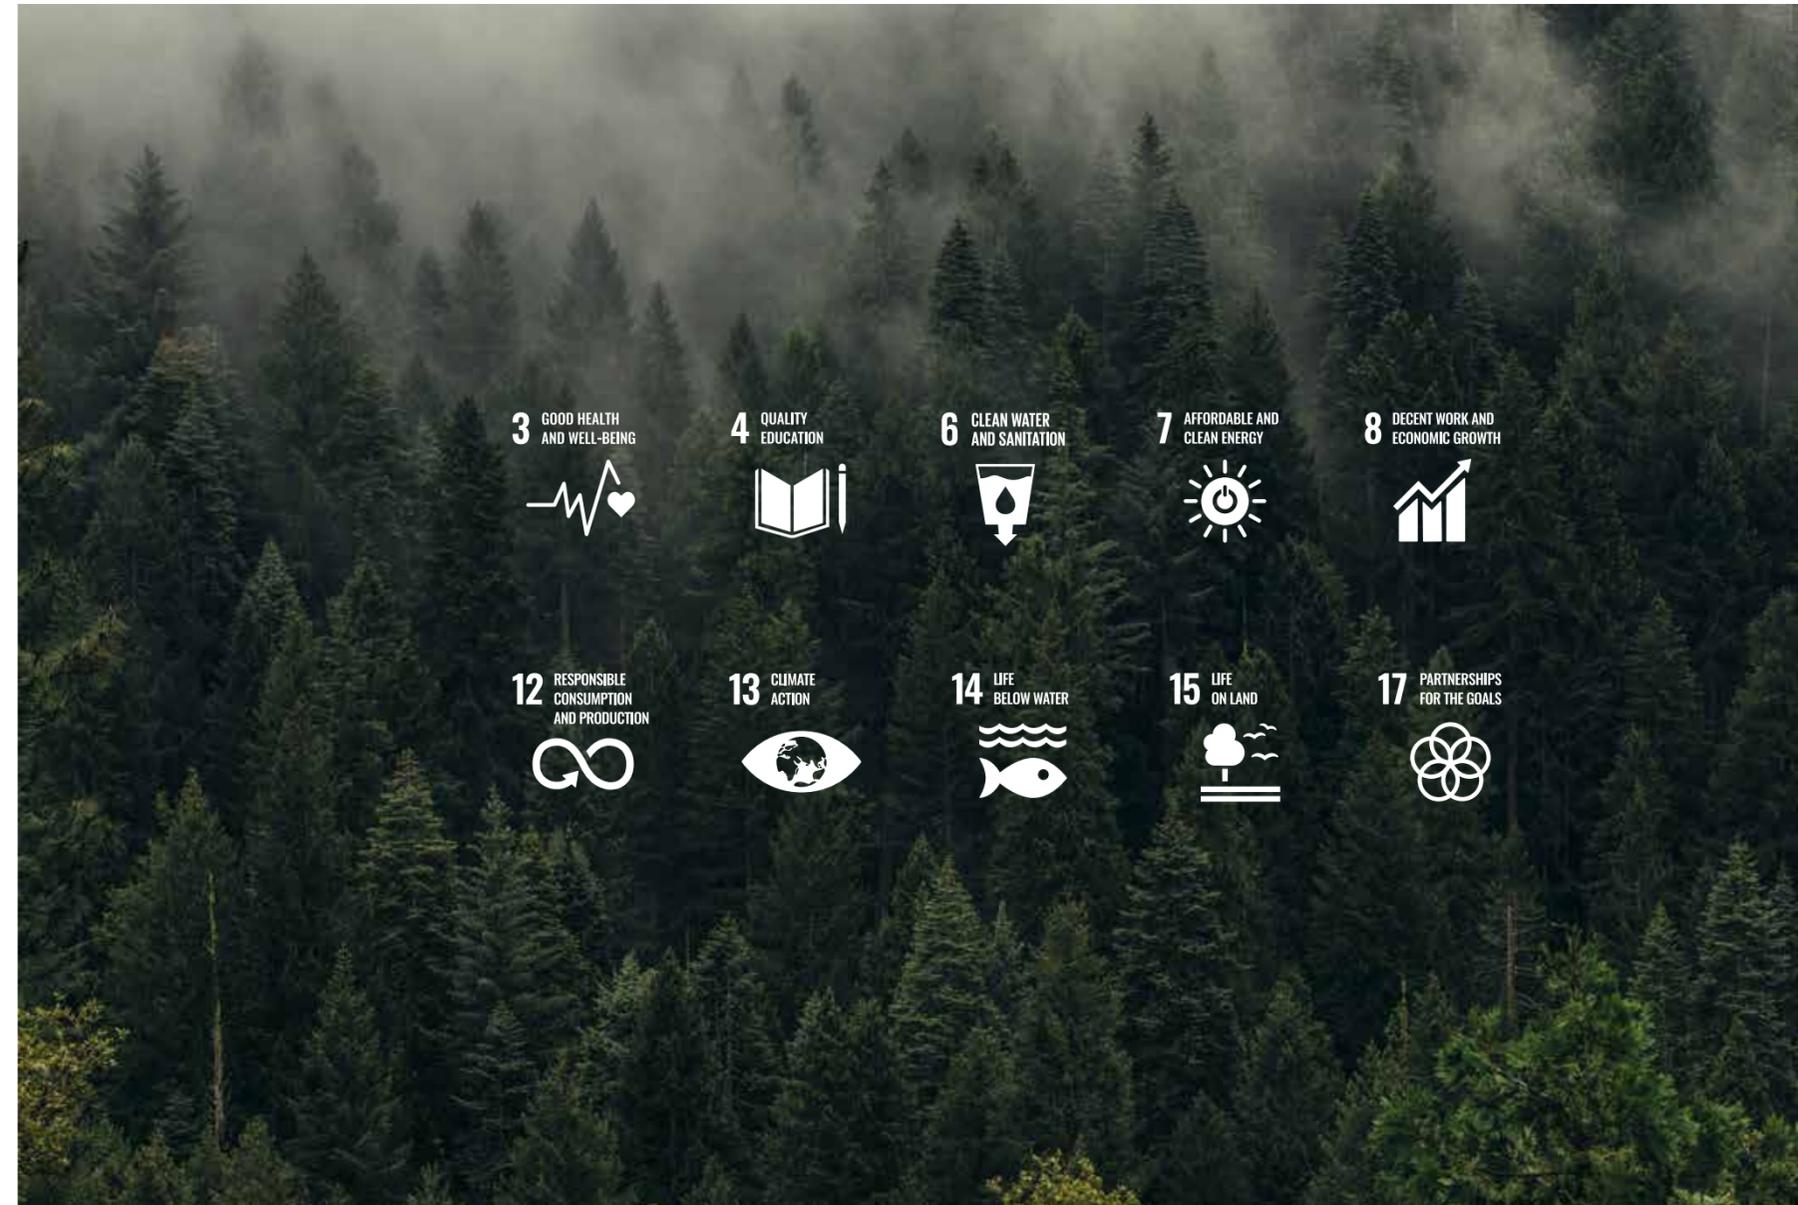

SUSTAINABILITY

Ascolia and Icarus Group strive for a balance between profitable growth, protection of the environment and responsible actions towards all shareholder groups. We base our actions on an integral view and sustainability combined with social responsibility. The companies of the Icarus Group make every effort to align our decisions with the UN Sustainable Development Goals.

As a manufacturer of rolling furniture Ascolia firmly believe that they can make a major contribution to meeting the challenges facing society today. Ascolia wants to take responsibility through our actions and contribute to collective global efforts relating to the environment, society and economy.

Our products are durable and do not harm the environment, neither in production nor in re-use and not in recycling. New products are added to our portfolio only after a careful examination of the recyclability of the used materials, the share of machining and environmental friendliness, and the sustainability of the materials being used.

Today, we obtain already 62% of our electricity from environmentally sustainable energy resources. Our specially designed aluminium profiles are made out of aluminium from Norway and are produced with more than 70% renewable energy such as water.

DURABLE MATERIALS AND CHARACTERISTICS

STRUCTURE IN ANODISED ALUMINIUM

Aluminium is a noble, **light** and resistant material. Anodising it gives it excellent **resistance** to scratches, chemical agents and saline corrosion. It is used in particular in the food industry and aeronautics. Aluminium is 3 times lighter than steel and is **indefinitely recyclable**.

COMPACT PANEL PARTITIONS WALLS

These finishing panels offer a multitude of choices when it comes to colour and very life-like wood aspects. They are **resistant to shocks, scratches** and humidity and are very light.

WHEELS

As essential elements to your comfort, the wheels used are of high quality. They are equipped with **precision ball bearings** that optimise manoeuvrability. The tyre of the wheel is **adapted** to the type of floor in your establishment.

MAINTENANCE

The materials chosen are selected to guarantee **easy maintenance** and to be **resistant** to mainstream detergents. The perfectly round angles and the absence of sharp edges facilitate and diminish maintenance.

ANODISATION

KEY ADVANTAGES

- **No possibility of fading.**
- Over 40 years of Proven long-term on-site **durability.**
- Authentic metallic sheen, lustre and feel.
- **Excellent Corrosion Resistance:** its natural oxide layer provides a self-defence against corrosion.
- **Excellent Abrasion Resistance** Aluminium oxide is a very hard compound, which is second only to diamond, on the Mohs scale of mineral hardness.
- **No risk of adhesion failure:** Anodising is an electrolytic process, which transforms the surface of the metal into an oxide layer integral with the metal itself.
- No possibility of fading or chalking.
- No possibility of filiform corrosion.
- Uniform surface finish for all metal shapes and textures.
- Optimal Coverage.
- Highly impermeable anodic layer: when severe environmental temperature fluctuations occur, the anodic layer is not subject to damaging physical changes and consequential embrittlement.
- Quality controls.
- **Environmental benefits** of pure anodised aluminium - 100% recyclable.
- **Environmentally friendly** production process in accordance with the latest environmental standards.
- Long-term Guarantees.

WELL-BEING FOR PEOPLE

Light & manoeuvrable

Noise cancelling

Easy maintenance

Motorisation helps heavy loads

High quality wheels with precision ball bearings

Nice design appeals customer

Ergonomic handle

WELL-BEING FOR INTERIOR

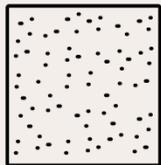

Design of mobile furniture in accordance to the design of your hotel

Special protection for design wall coverings

Super silent high quality wheels

Adapted wheels protecting your different types of floor

Soft close on lid

Soft close on drawers

WELL-PROTECTING LINEN

- **Fixed shelves** adapted to your linen size.
- **No loose sharp components** in the linen section in order to avoid stitches.
- **Smooth** anodised aluminium **shelves** make the shelves resistant to scratches and protect your linen from stitches.
- Complete **clean smooth surfaces** all around.
- **No seams or gaps** where your linen can hook on.
- The body of our trolleys is a glued **monobloc structure**: so **no screws are used** and cannot hook on your linen. (see picture below)

MOTORISATION

3 different types of motorisation for 27 motorised trolleys.

350 Watt - 24 Ah

250 Watt - 18 Ah

HOUSEKEEPING

You require a room service that is discrete, tidy and efficient.

By listening to your needs, Ascolia has developed a functional, easy to handle and ergonomic range of housekeeping trolleys.

A very wide range to cater for all your needs.

Multiple storage options, optimisation of space, quality of the finish, each detail has been the subject of careful study focusing on the comfort of the user.
